

Texas Home Outlet

Your Quick Guide

What changed, and what you need to know — the short version. Nothing here is complicated, and nothing on your end is broken.

Our website has a new home

The website now lives at its real name:

www.texashomeoutlet.com

It is live, secure, and ready. The old temporary web address has been retired.

Three things to know (that is really it)

- **The site is live and secure.** Look for the small padlock symbol next to the web address — that means it is safe.
- **Your email did NOT change.** Messages to your **@texashomeoutlet.com** address work exactly as before. Nothing to do.
- **Old links still work.** Anyone using an old bookmark or search result is sent to the right page automatically.

How to check the website (about 30 seconds)

1. Open your web browser (Chrome, Safari, Edge — whichever you use).
2. Type **www.texashomeoutlet.com** at the top and press Enter.
3. The site loads with a small padlock by the address. That is it — you are done.

Getting into the back office (leads, appointments, tools)

1. Go to **www.texashomeoutlet.com**.
2. Click the small **lock icon** near the top of the page.
3. Enter your **team PIN**. You are in — leads, appointments, documents, and the marketing studio are all there.

Do not have the PIN, or it is not working? Just ask Ari — please do not share the PIN by email or text.

If something looks off

Take a breath — nothing on your end is broken, and any change can be reversed in minutes. Simply **reply to the update email** or **text Ari**, and we will sort it out fast.
